

DATA SHEET

V-Mount Plate for Alexa 35

PAG-8004 / EAN 5060845320582

- V-Mount battery connector plate designed to replace the B-Mount plate supplied with the Arri Alexa 35.
- Features PAG's Cinergy barcode, positioned precisely for alignment with the sensor on the rear of the Mini PAGlink Cinergy Battery. This enables the voltage output of two 14V batteries to be combined to provide 28V.
- High-current contact pins.
- High-quality, anodised aluminium plate.

PAG's V-Mount plate for the Arri Alexa 35 camera is a high-quality, ultra-durable battery mount, engineered from aluminium and anodised for an attractive finish. It features high-current contact pins and a sprung lever for battery removal.

The plate is easy to fit, requiring only the screws provided.

PAG has applied the Cinergy barcode label to this V-Mount plate so that the V-Mount Cinergy battery system can be used to power the Arri Alexa 35. When you link a PAG MPL99 Cinergy battery to

another PAG MPL99 battery, and connect it to this mount, the Cinergy battery's sensor will read the barcode and initiate high-voltage mode, when the Cinergy battery's display button is pressed for 3 seconds. The voltage output of both 14V batteries will be combined.

SPECIFICATION

Model No. PAG-8004

Overall Dimensions:

Length:	118mm	4.6"
Width:	97mm	3.8"
Depth:	31.5mm	1.2"

Suitable Batteries:

V-Mount.

Warranty:

2 years.
